DETAILED ACTION

Drawings

1. The drawings filed on February 6, 2004 are objected to because it would appear that the expression "PUT IN CARB." and its lead line with arrow were unintentionally inserted into Figure 2. Clarification is required and/or corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Art Unit: 1724

Specification

2. The disclosure is objected to because the word "fowling" on the last line of paragraph [0004] on page 1 and the penultimate line of paragraph [0006] on page 2 should apparently be changed to --fouling--. Appropriate correction is required.

Claim Objections

3. Claim 19 is objected to because of the following informalities: (A) The word "recite" on the first line of claim 19 should apparently be changed to --recited--. (B) The word "or" on the second line of claim 19 should apparently be changed to --of--. Appropriate correction is required.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-5, 9-13, and 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,133,905 to Woody et al in view of U.S. Patent No. 6,561,495 to Woody. Woody et al (note Figures 5, 6, 13, 16, 23, ref. characters 80, 80', Abstract, col. 5, line 5 to col. 12, line 43) show a carburetor with a fuel enrichment system substantially as claimed. It would appear that Woody et al may not explicitly state the fuel enrichment system is responsive to

Art Unit: 1724

engine vibrations. In any case, Woody (note Figures 8-13, ref. num. 109, and col. 5, line 48 to col. 7, line 19) teaches the well-known use of a ball responsive to engine vibration in a carburetor fuel enrichment system for the purpose of ensuring both proper fuel metering and fuel bowl venting. Consequently, it would have been readily obvious to one having ordinary skill in the art to employ a ball responsive to engine vibrations in the Woody et al carburetor fuel enrichment system in order to facilitate fuel metering and fuel bowl venting as taught by Woody.

Allowable Subject Matter

6. Claims 6-8, and 14-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. These references have been cited as art of interest to show other carburetors.
